Digital Algebra Notes

Line 1: A digital text layer supports local extraction.
Line 2: A digital text layer supports local extraction.
Line 3: A digital text layer supports local extraction.
Line 4: A digital text layer supports local extraction.
Line 5: A digital text layer supports local extraction.
Line 6: A digital text layer supports local extraction.
Line 7: A digital text layer supports local extraction.
Line 8: A digital text layer supports local extraction.
Line 9: A digital text layer supports local extraction.
Line 10: A digital text layer supports local extraction.
Line 11: A digital text layer supports local extraction.
Line 12: A digital text layer supports local extraction.
Line 13: A digital text layer supports local extraction.
Line 14: A digital text layer supports local extraction.
Line 15: A digital text layer supports local extraction.
Line 16: A digital text layer supports local extraction.
Line 17: A digital text layer supports local extraction.
Line 18: A digital text layer supports local extraction.
Line 19: A digital text layer supports local extraction.
Line 20: A digital text layer supports local extraction.
Line 21: A digital text layer supports local extraction.
Line 22: A digital text layer supports local extraction.
Line 23: A digital text layer supports local extraction.
Line 24: A digital text layer supports local extraction.
Line 25: A digital text layer supports local extraction.
Line 26: A digital text layer supports local extraction.
Line 27: A digital text layer supports local extraction.
Line 28: A digital text layer supports local extraction.
